Romulus Lucaciu

General manager at ETA2U

He graduated the Faculty of Electronics and Telecommunications Technology in 1987.

He started his professional career at IIRUC - The Maintenance and Repair of Equipment Computing Enterprise (the only enterprise specialized in IT technical assistance in Romania), as a specialized engineer in large computer systems.

In 1990 he establishes a small firm, specialized in technical assistance for the new equipment which started to appear on Romanian market: personal computers.

In 1992 he founded ETA2U Computer, which is today the most important company in the group, IT integrator, with a turnover of 20 million euros and 200 employees.

In 1998 he establishes ETA Industrial Automatization specialized in design, integration of SCADA systems and fleet management solutions, company which moves businesses outside the country: Italy, Kosovo, Turkey and Georgia.

In 2003 he takes over, in a tender, the old Territorial Computing Center of Timişoara, INFOTIM SA, following to encapsulate the IT training activities and software development. Through this takeover, INFOTIM became the most important training centre, outside the capital, Microsoft, Oracle, CISCO etc.

In 2005 he founded a company specialized in professional IT services and solutions-ITPS based on Microsoft, Solaris, Vmware, Novell, Linux, Unix technology, using IBM, HP, DELL and Oracle platforms.

Today, ETA2U, ETA AI, INFOTIM, ITPS runs businesses of 23 million euros.
